

Complete Canine Flea & Tick Prevention

The Goal of Prevention

*With tick disease on the rise in Wisconsin (and nationally); year-round broad-spectrum parasite control with efficacy against fleas and ticks is very important.

*Quick kill before any time to feed is most desirable to prevent disease transmission

*Some parasites have zoonotic potential and can be transmitted to humans.

Comparison of the safe & effective products recommended by WTVC

Name of Prevention	WTVC's Cost Per Dose (After Rebates)	Active Ingredients	Speed of Tick Kill	Duration of Effect	100% Guaranteed Efficacy	Parasite Repellency	Safety
